# MAP LEGEND

*Difficulty Rating - The difficulty ratings were established by taking into account the elevation gain and/or loss of the leg (70%), the length of the leg (20%) and other variables including but not limited to: time of day runner/walker will be on the course, type of road surface and congestion/ruralness of the area (10%). The ratings are highly subjective and correspond to an approximate 10% increase in difficulty from one rating to the next. (E - Easy. M - Moderate. H - Hard. VH - Very Hard.)*

**Peak Symbol** - The "Peak" symbol is used to identify those legs of the course that a reasonable person would regard as "scenic" and/or "beautiful." Although many conversations have been had about what actually constitutes as "scenic" and/or "beautiful," the end result is a somewhat telling example of the diverse beauty and splendor of Central Oregon.

**Mosquito Symbol** - The "Mosquito" symbol is used to identify those legs of the course where it would be prudent to wear bug/insect/mosquito repellent if you would rather not be carried away to your death by gigantic, fire-breathing, spear-like piercing mosquitos. This goes for anyone who will be exposed to the air outside of their vehicle.

**Water Symbol** - The "water" symbol is used to identify where water will be provided free of charge from our sponsors. Water will be available in the form of 5-gallon jugs, so please **bring a water bottle or re-usable container to fill up as we are making new efforts to reduce waste from many needless plastic bottles!**

**Bed symbol** - The "Bed" symbol is used to identify where accommodations can be purchased from community providers.

**Gas symbol** - The "Gas" symbol is used to identify where gas can be purchased from community providers.

**Food symbol** - The "Food" symbol is used to identify where food & coffee can be purchased from community providers

**Arrow symbol** - When you come to an intersection and there are no arrow signs, you should continue straight. When there is an intersection where you should turn, you will see a directional CLR arrow.

**CLR Shield** - Exchange point

Emergency Communication teams will be stationed at the following exchange points where there is a lack of cell reception. If you have a medical emergency AND don't have cell reception to call 911 AND the injured runner is capable of transporting in your van, please drive to the nearest Emergency Communication Station (ECS). These Emergency Communication Stations (ECS) will have ability to communicate with 911 Dispatch, local EMS agencies, Air-Link, and the Cascade Relays Medical Team. ECS's are found at Exchange Points #2a, 5, 6, 8, 10, 13, 16, 18, 20, 27. In some cases, the nearest ECS may be behind you.

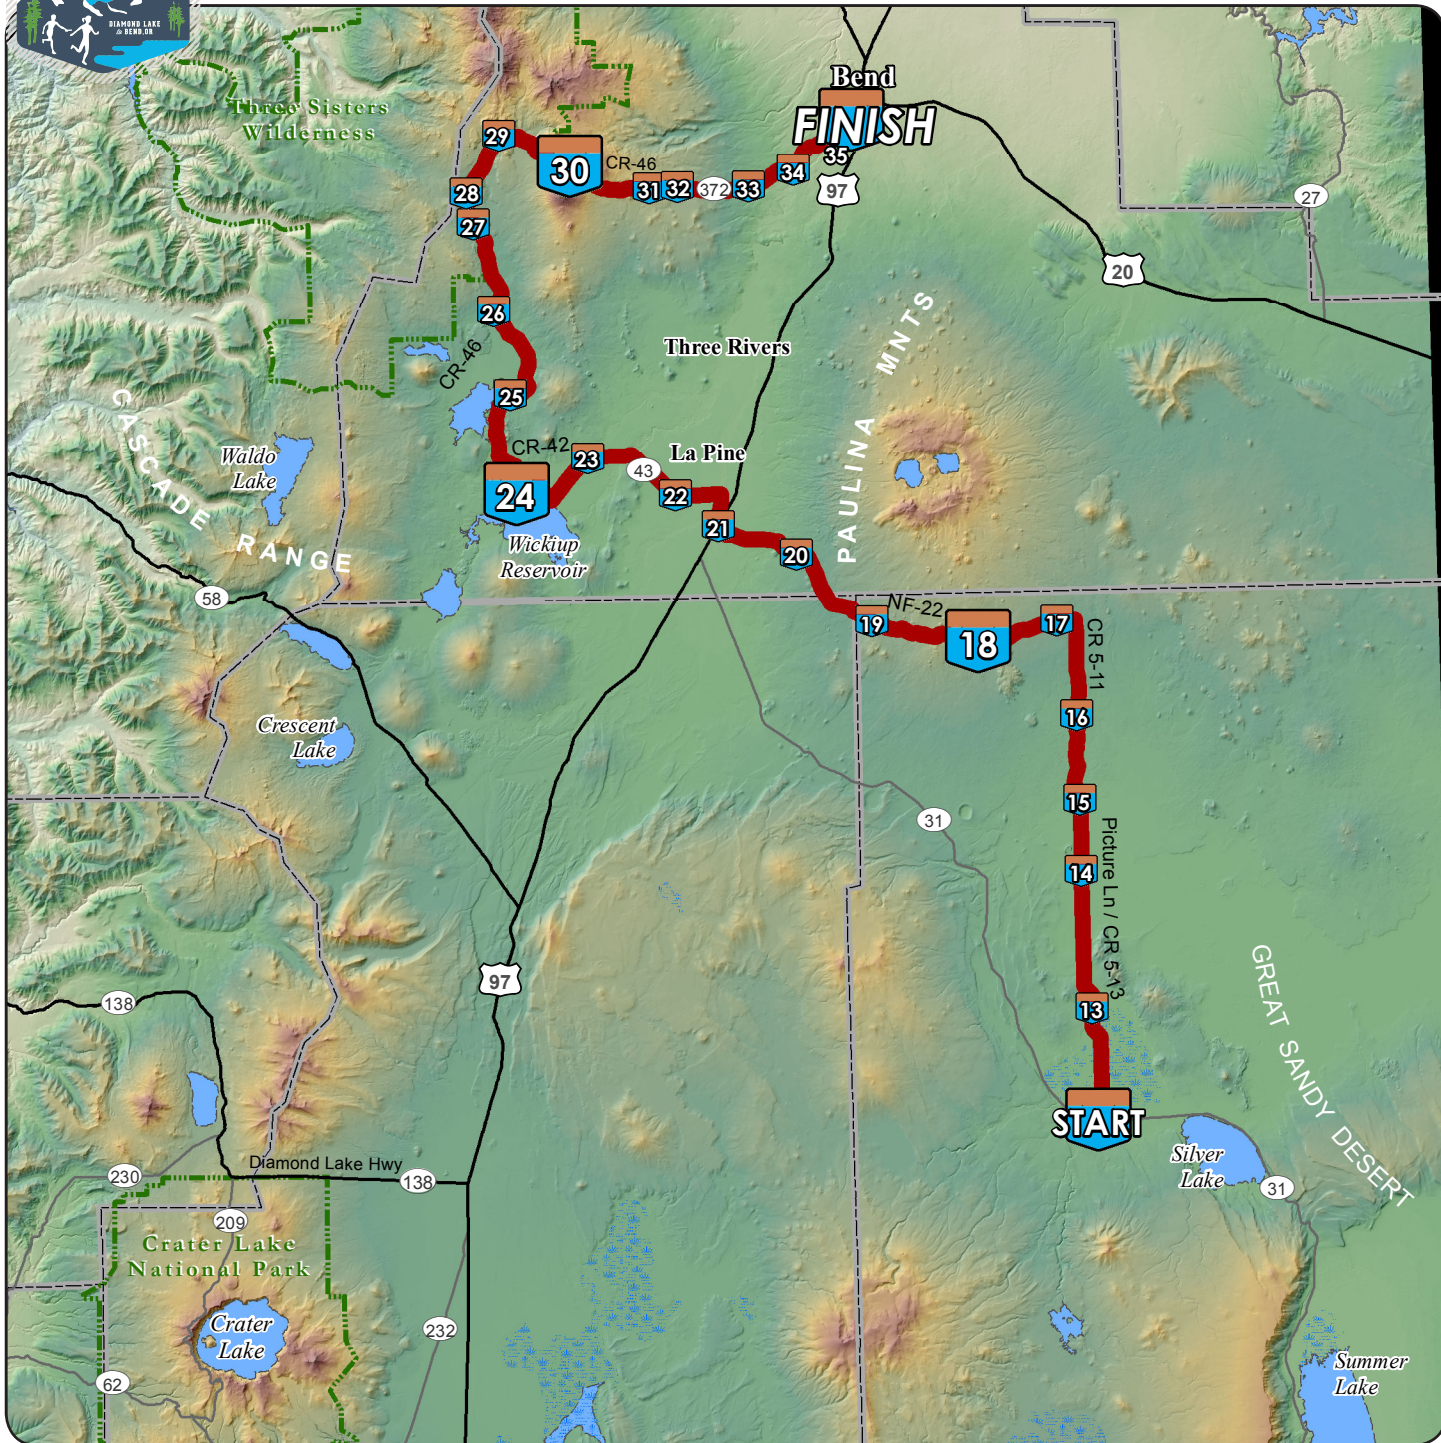

**Route** - Running route shown as red line, mile markers as white circle, and tenth mile markers as white dots. **Please pay attention to instructions to run on the LEFT or RIGHT side of the road as instructed. We have runners on the LEFT whenever possible. However, due to traffic patterns (for example, cars drive slower uphill than downhill), safety concerns, and exchange point locations, please follow instructions to run/walk on the RIGHT when instructed to do so in the Official Race Map. It becomes extremely unsafe when participants are on both sides of the road; therefore, teams will be disqualified and asked to leave the course if they are seen on the wrong side of the road.**

**Van Route** - On some legs of the race, Vans are required to follow a different route than that shown for the runner/walker. When this occurs the Van Route is depicted using a yellow/black dashed line. Inactive Vans shall follow the Route Maps as indicated for Inactive Vans.
